

360L LARGE BERGEN DRY BAG WITH MOLLE SYSTEM

Close up of the MOLLE panels.

Large 360L MOLLE Bergen Dry Bag

Designed for diving, rescue, military and commercial applications, the Large MOLLE Bergen Dry Bag provides 360L of watertight and airtight storage for bulky equipment.

Made from durable 600D nylon TPU CN, it features an 8-pitch BDM metal dry zip, fully welded seams and reinforced construction for reliable protection in demanding environments.

The bag includes padded shoulder straps, an adjustable waist belt, compression straps and reinforced handles, and is load tested to 100kg (220lb).

Integrated MOLLE panels on the front and sides allow additional pouches and equipment to be attached, while the inflation/deflation system allows internal air pressure to be adjusted.

Custom branding is available with reflective or full-colour logo printing.

KEY SPECIFICATIONS

Weight: 3.9kg
Volume: 360L
Width: 60cm (24")
Height: 107cm (42")
