

3MM SRE ZIPPED GLOVES

The latest version of our popular SRE glove range, the 3mm SRE Zipped Gloves ensure that flexibility, warmth and grip is not compromised.

Manufactured from super-stretch 3mm neoprene with an inner nylon lining and glide-skin seal, this allows for thermal protection and comfort in any conditions. Neoprene by its nature does not provide grip, but thanks to the overprinted design on the back of the hand, palm and fingers, a high level of grip and abrasion protection is achieved.

Complete with a durable zip and Velcro closing tab, you can be assured that a secure fit will always be achieved.

FEATURES

- 3mm neoprene thickness
- Fabric build: superstretch neoprene with anti-velcro lining
- Inner nylon lining with glide-skin seal
- Triple glued and blind stitched seams
- Overprinted back of hand, palm and fingers
- Long plastic zip with Velcro closing zip tab
