HOSE RETAINING CLIP (HC363)

Keep your diving equipment secure and within easy reach with the Northern Diver Scuba Hose Clip. Designed to hold your regulator, pressure gauge or inflator hose neatly against your BCD, this practical accessory helps prevent hoses from dangling, dragging or becoming snagged during the dive.

Unlike many standard hose holders that allow hoses to slip or pop free, the Northern Diver Scuba Hose Clip provides a firm, reliable grip on a wide range of hose diameters, including many of today's slimmer low-pressure regulator hoses. Its secure design keeps your alternate air source and gauges exactly where you need them, improving streamlining and reducing the risk of accidental damage.

Manufactured from durable, lightweight engineering plastic, the hose clip is built to withstand the harsh marine environment without adding unnecessary weight to your dive kit. Suitable for both recreational scuba divers and commercial diving professionals, it is an essential addition to any BCD setup.

Whether you're exploring reefs, working underwater or carrying out training dives, the Northern Diver Scuba Hose Clip helps keep your equipment organised and accessible.

KEY FEATURES
Secure hose retention
Direct BCD attachment
Firm, reliable grip
Wide hose compatibility
Improved equipment streamlining
Lightweight engineering plastic
Corrosion-resistant construction
Easy to fit and use
Versatile equipment management
Suitable for multiple diving applications
