

DIVERS PORTABLE EMERGENCY OXYGEN RESUSCITATION KIT

Be prepared to respond when every second counts with the Northern Diver Portable Emergency Oxygen Resus Kit. Designed for divers, rescue teams, commercial operators and military personnel, this comprehensive oxygen delivery system provides the essential equipment needed to administer emergency oxygen therapy while awaiting professional medical assistance.

Supplied in a purpose-built 23L Professional Responder Rucksack, the kit is lightweight, portable and organised for rapid deployment. It includes a 2L, 200 bar PIN index oxygen cylinder (supplied empty) with a high-quality regulator offering adjustable flow rates from 1–15 litres per minute, providing up to 30 minutes of oxygen delivery at maximum flow.

The kit contains a complete range of emergency airway management and resuscitation equipment, including an oxygen demand valve, oxygen therapy masks, bag-valve-mask (BVM), pocket mask, resuscitation face masks and oropharyngeal airways. Manufactured from durable, medical-grade components, it is built for dependable performance in demanding environments.

Whether on a dive boat, inland dive site, offshore platform or emergency response vehicle, the Northern Diver Portable Emergency Oxygen Resus Kit provides a complete, self-contained oxygen delivery solution for professional emergency response.
