

VOYAGER ALL TERRAIN TRAVEL BAG

Like the size, capacity and ruggedness offered by the Voyager Lightweight, but want to be able to take it anywhere? Look no further than the Voyager All Terrain Bag.

In terms of capacity, it remains the same. In fact, the only difference with the All-Terrain is the use of high-grade washable PVC in the bags manufacture.

As you could guess, the All-Terrain Lightweight easily withstands frequent washing by hand, both inside and out, and is ideal for carrying soiled diving equipment. It can be hung up to dry, but obviously should not be machine dried.

The All Terrains high-grade PVC retains the hard-wearing nature of the original Voyager Lightweight, and weight isn't significantly compromised. Add to these qualities the ability to wash it and the Voyager All Terrain Bag can be considered your go-to bag for a multitude of diving scenarios.
